

TRANSVERSAL SKILLS LABORATORY

**GESTIONE E PRATICA DEI CONTRATTI INTERNAZIONALI NEL SETTORE DEGLI
INVESTIMENTI ESTERI DIRETTI**

**MANAGEMENT & PRACTICE OF INTERNATIONAL CONTRACTS IN THE FOREIGN
DIRECT INVESTMENTS SECTOR**

Outline and methodology

The laboratory, scheduled into six modules, deals with the role of the contract in the foreign direct investments sector with a theoretical-practical approach.

A bi-directional perspective is adopted that covers national companies bent on foreign markets and foreign companies turned on domestic markets.

Against the background of globalised markets, attendees - mainly students - will get familiar with the growing phenomena of reshoring, nearshoring, and friend-shoring, as well as the 'ESG' impact on international business. Accordingly, lectures and workshops will adopt a law-and-economics approach.

Attendees will also acquire knowledge of the primary means to settle commercial and investment disputes as well as to deal with the impact of insolvency proceedings upon contracts devoted to implementing investments.

UNIDROIT, the Southern Adriatic Sea Port System Authority and INSOL Europe support the event. Representatives of the three institutions are included in the teaching staff.

Language: Italian and English without simultaneous interpretation.
